

QUALITY, HEALTH, SAFETY, ENVIRONMENT and ENERGY POLICY

PURPOSE

Sitek Insulation, a recognized producer of fire resistant and insulating panels, is **committed to providing solutions to the ever-changing technical, environmental and energy requirements** of the market on behalf of itself and its customers.

To meet this objective, we need to build on key values:

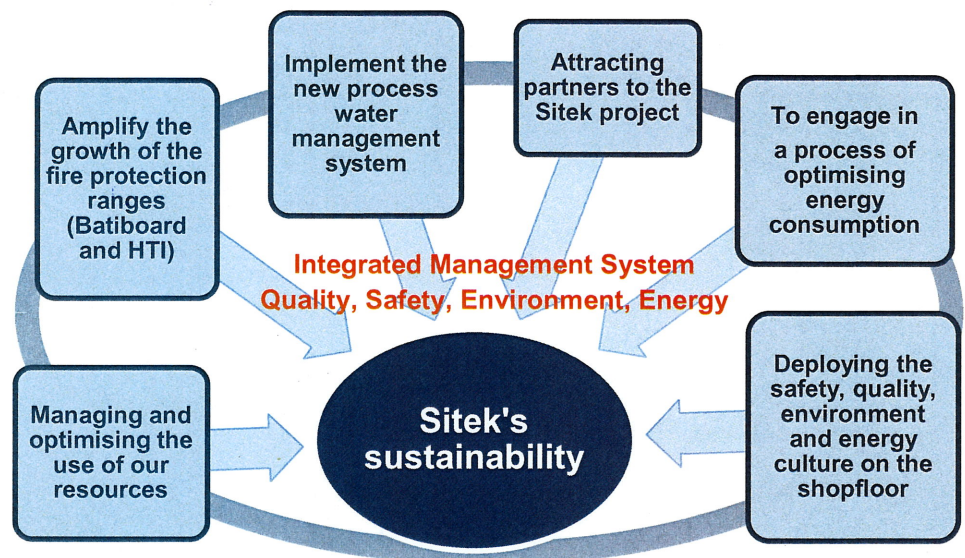

Sitek Insulation is structured according to ISO 9001, ISO 14001 and ISO 50001.

Our Integrated Management System applies to all the products and services offered by our company, to all the activities required to design, manufacture, market and dispatch insulating and fire protection panels and expanded perlite.

COMMITMENTS & 2022-2023 PRIORITIES

Compliance with regulations and standards, reduction of environmental impacts, and improvement of energy performance are permanent commitments of the company. In addition, we are aiming for 2022-2023 :

These commitments are **monitored** during management meetings to identify any deviations and to implement appropriate corrective actions. Management will assess these objectives on a regular basis in order **continuously to improve our performance**.
